

Please keep Wisconsin's "do not call list" as is. I have a daughter who is severely disabled, and often has illnesses and seizures that cause her to sleep during the day. I do not want to have her rest disturbed by telemarketers EVER again! Also, I have elderly parents who have some difficulty with mobility - they should not have to be made to go to the phone needlessly each time a telemarketer targets them. Both of our households are currently on the do not call list here, and we WANT IT TO REMAIN that way. Our quality of life is significantly impacted by this constant intrusion into our homes. Thank you. Please contact me if you need further information.
